

v8::internal::compiler
::SpecialRPONumberer::
HasLoopNumber

```
graph LR; A["v8::internal::compiler  
::SpecialRPONumberer::  
HasLoopNumber"] --> B["v8::internal::compiler  
::BasicBlock::loop_number"]
```

A diagram showing a relationship between two V8 compiler classes. On the left, a gray box contains the text 'v8::internal::compiler', '::SpecialRPONumberer::', and 'HasLoopNumber'. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::compiler' and '::BasicBlock::loop_number'.
