

v8::internal::Factory
::NewStringFromTwoByte

```
graph LR; A["v8::internal::Factory  
::NewStringFromTwoByte"] --> B["v8::internal::Factory  
::NewStringFromTwoByte"]
```

The diagram consists of two rectangular boxes connected by a horizontal arrow. The left box has a light gray background and a black border, containing the text 'v8::internal::Factory' on the first line and '::NewStringFromTwoByte' on the second line. A dark blue arrow points from the right side of this box to the left side of the right box. The right box has a white background and a black border, containing the same text: 'v8::internal::Factory' on the first line and '::NewStringFromTwoByte' on the second line.
