

v8::internal::SharedMacro  
AssemblerBase::F64x2Qfma

v8::internal::SharedMacro  
AssemblerBase::F64x2Qfms

v8::internal::Assembler::pd

```
graph LR; A["v8::internal::SharedMacro<br>AssemblerBase::F64x2Qfma"] --> C["v8::internal::Assembler::pd"]; B["v8::internal::SharedMacro<br>AssemblerBase::F64x2Qfms"] --> C;
```

The diagram illustrates a mapping from two source identifiers to a single target identifier. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'v8::internal::SharedMacro' followed by 'AssemblerBase::F64x2Qfma' on the next line. The bottom box contains 'v8::internal::SharedMacro' followed by 'AssemblerBase::F64x2Qfms' on the next line. On the right, there is a gray rectangular box with a black border containing the text 'v8::internal::Assembler::pd'. Two blue arrows originate from the right side of the two source boxes and point towards the left side of the target box, indicating a relationship or mapping.
