

v8::internal::Serializer
::ObjectSerializer::SerializePrologue

```
graph LR; A["v8::internal::Serializer  
::ObjectSerializer::SerializePrologue"] --> B["v8::internal::Serializer  
::ResolvePendingObject"]
```

A diagram showing a call from the `SerializePrologue` method of `v8::internal::ObjectSerializer` to the `ResolvePendingObject` method of `v8::internal::Serializer`. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
