

v8::internal::Detachable
Vector::back

v8::internal::Detachable
Vector::front

v8::internal::Detachable
Vector::at

```
graph LR; A[v8::internal::Detachable Vector::back] --> C[v8::internal::Detachable Vector::at]; B[v8::internal::Detachable Vector::front] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::Detachable Vector::back' and the bottom box contains 'v8::internal::Detachable Vector::front'. On the right, there is a single gray rectangular box containing the text 'v8::internal::Detachable Vector::at'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'back' and 'front' methods are mapped to the 'at' method.
