

v8::internal::torque
::InstructionBase

```
graph BT; A["v8::internal::torque::CallCsaMacroInstruction"] --> B["v8::internal::torque::InstructionBase"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray box representing the base class, `v8::internal::torque::CallCsaMacroInstruction`. A blue arrow points upwards from this box to a white box at the top, which represents the derived class, `v8::internal::torque::InstructionBase`. This indicates that `CallCsaMacroInstruction` inherits from `InstructionBase`.
