

v8::internal::wasm
::TypeCanonicalizer
::CheckMaxCanonicalIndex

```
graph LR; A["v8::internal::wasm  
::TypeCanonicalizer  
::CheckMaxCanonicalIndex"] --> B["v8::internal::V8::FatalProcess  
OutOfMemory"]
```

A diagram showing a call from a WebAssembly (wasm) TypeCanonicalizer to a V8 FatalProcess OutOfMemory handler. The left box, with a gray background, contains the code 'v8::internal::wasm::TypeCanonicalizer::CheckMaxCanonicalIndex'. A blue arrow points from this box to the right box, which has a white background and contains the code 'v8::internal::V8::FatalProcess OutOfMemory'.

v8::internal::V8::FatalProcess
