

v8::internal::AllStatic

```
classDiagram
    class AllStatic["v8::internal::AllStatic"]
    class ExperimentalRegExpCompiler["v8::internal::Experimental\nRegExpCompiler"]
    ExperimentalRegExpCompiler --|> AllStatic
```

The diagram consists of two class boxes. The top box, representing the base class, is divided into three horizontal sections. The first section contains the text 'v8::internal::AllStatic', while the other two are empty. The bottom box, representing the derived class, is also divided into three horizontal sections. The top section contains the text 'v8::internal::Experimental\nRegExpCompiler'. The middle section is empty. The bottom section contains two lines of text: '+ CanBeHandled()' and '+ Compile()'. A blue arrow with an open triangular head points from the top edge of the bottom box to the bottom edge of the top box, indicating an inheritance relationship.

v8::internal::Experimental  
RegExpCompiler

+ CanBeHandled()  
+ Compile()
