

std::true\_type

```
graph BT; A["v8::internal::detail::is_simple_subtype<Object, Union< HeapObject, Smi > >"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a large gray rectangle divided into three horizontal sections. The top section contains the text `v8::internal::detail::is_simple_subtype<Object, Union< HeapObject, Smi > >`. A blue arrow points upwards from the top edge of this gray rectangle to the bottom edge of a white rectangle above it. The white rectangle is also divided into three horizontal sections, with the text `std::true_type` in its top section.
