```
graph LR; A["v8::internal::wasm::liftoff::CalculateActualAddress"] --> C["v8::internal::AssemblerRISCVI::mv"]; B["v8::internal::wasm::liftoff::EnsureNoAlias"] --> C;
```

The diagram illustrates a call graph where two source functions, `v8::internal::wasm::liftoff::CalculateActualAddress` and `v8::internal::wasm::liftoff::EnsureNoAlias`, both point to a common target function, `v8::internal::AssemblerRISCVI::mv`. The source functions are in white boxes, and the target function is in a gray box. Blue arrows indicate the direction of the calls.
