

v8::internal::FixedDouble
Array::get_scalar

v8::internal::FixedDouble
Array::set

v8::internal::FixedDouble
Array::is_the_hole

```
graph LR; A["v8::internal::FixedDouble  
Array::get_scalar"] --> C["v8::internal::FixedDouble  
Array::is_the_hole"]; B["v8::internal::FixedDouble  
Array::set"] --> C;
```

The diagram illustrates a relationship between three V8 JavaScript engine functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::FixedDouble Array::get_scalar' (top) and 'v8::internal::FixedDouble Array::set' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::FixedDouble Array::is_the_hole'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both 'get_scalar' and 'set' methods utilize the 'is_the_hole' function.
