

v8::internal::compiler
::InstructionSequence
::DefaultRepresentation

```
graph LR; A["v8::internal::compiler  
::InstructionSequence  
::DefaultRepresentation"] --> B["v8::internal::MachineType  
::PointerRepresentation"]
```

A diagram showing a relationship between two V8 internal classes. On the left, a gray box contains the text 'v8::internal::compiler', 'v8::InstructionSequence', and 'v8::DefaultRepresentation'. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::MachineType' and 'v8::PointerRepresentation'.
