

std::false\_type

```
classDiagram
    class cppgc_internal_IsTraceable["cppgc::internal::IsTraceable<T, typename>"]
    class std_false_type["std::false_type"]
    cppgc_internal_IsTraceable --|> std_false_type
```

The diagram illustrates an inheritance relationship. At the bottom is a class box for 'cppgc::internal::IsTraceable < T, typename >' with a gray background. At the top is a class box for 'std::false\_type' with a white background. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating that 'std::false\_type' inherits from 'cppgc::internal::IsTraceable'.

cppgc::internal::IsTraceable  
< T, typename >
