

v8::internal::torque  
::ImplementationVisitor  
::GetLocationReference

```
graph LR; A["v8::internal::torque  
::ImplementationVisitor  
::GetLocationReference"] --> B["v8::internal::torque  
::Declarations::TryLookupBuiltin"]
```

A diagram showing a call from the `ImplementationVisitor::GetLocationReference` method to the `TryLookupBuiltin` method. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
