

TorqueGeneratedJSWeakCollection  
< JSWeakCollection, JSObject >

const

kAddFunctionDescriptorIndex  
kHeaderSizeOfAllWeakCollections

v8::internal::JSWeakCollection

```
graph BT; A[v8::internal::JSWeakCollection] -- solid blue arrow --> B[TorqueGeneratedJSWeakCollection < JSWeakCollection, JSObject >]; A -. dashed purple arrow .-> C[const]; C --- D[kAddFunctionDescriptorIndex kHeaderSizeOfAllWeakCollections];
```

The diagram illustrates the relationship between three entities. At the bottom is a grey box labeled 'v8::internal::JSWeakCollection'. A solid blue arrow points from this box to a white box at the top left labeled 'TorqueGeneratedJSWeakCollection < JSWeakCollection, JSObject >'. A dashed purple arrow points from the 'v8::internal::JSWeakCollection' box to a white box at the top right labeled 'const'. To the right of the 'const' box, the text 'kAddFunctionDescriptorIndex' and 'kHeaderSizeOfAllWeakCollections' is displayed.
