

v8::internal::compiler
::RepresentationSelector
::VisitCheckBounds

```
graph LR; A["v8::internal::compiler  
::RepresentationSelector  
::VisitCheckBounds"] --> B["v8::internal::compiler  
::UseInfo::CheckedTaggedAsArrayIndex"]
```

A diagram showing a call from the `VisitCheckBounds` method of the `RepresentationSelector` class to the `CheckedTaggedAsArrayIndex` method of the `UseInfo` class. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
