

v8::ArrayBuffer::GetBackingStore

v8::SharedArrayBuffer::GetBackingStore

v8::internal::BackingStore  
::EmptyBackingStore

```
graph LR; A[v8::ArrayBuffer::GetBackingStore] --> C[v8::internal::BackingStore::EmptyBackingStore]; B[v8::SharedArrayBuffer::GetBackingStore] --> C;
```

The diagram illustrates a relationship between two methods and a common target. On the left, there are two white rectangular boxes. The top box contains the text 'v8::ArrayBuffer::GetBackingStore' and the bottom box contains 'v8::SharedArrayBuffer::GetBackingStore'. On the right, there is a gray rectangular box containing the text 'v8::internal::BackingStore::EmptyBackingStore'. Two blue arrows originate from the right side of the top-left box and the right side of the bottom-left box, both pointing towards the left side of the gray box on the right.
