

v8::internal::baseline
::BaselineAssembler::EmitReturn

v8::internal::baseline
::detail::MoveArgumentsForBuiltin

v8::internal::baseline
::BaselineAssembler::LoadContext

```
graph LR; A["v8::internal::baseline  
::BaselineAssembler::EmitReturn"] --> C["v8::internal::baseline  
::BaselineAssembler::LoadContext"]; B["v8::internal::baseline  
::detail::MoveArgumentsForBuiltin"] --> C;
```

The diagram illustrates a mapping or transformation between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::baseline' followed by '::BaselineAssembler::EmitReturn' on the next line. The bottom box contains 'v8::internal::baseline' followed by '::detail::MoveArgumentsForBuiltin' on the next line. On the right, there is a gray rectangular box containing 'v8::internal::baseline' followed by '::BaselineAssembler::LoadContext' on the next line. Two blue arrows point from the right side of the top white box to the left side of the gray box, and from the right side of the bottom white box to the left side of the gray box.
