

v8::internal::wasm
::AsyncStreamingDecoder
::Abort

```
graph LR; A["v8::internal::wasm  
::AsyncStreamingDecoder  
::Abort"] --> B["v8::internal::wasm  
::AsyncStreamingDecoder::Fail"]
```

A diagram showing a transition between two states of the `v8::internal::wasm::AsyncStreamingDecoder`. The left box, which has a light gray background, represents the initial state with the `::Abort` method. A blue arrow points from this box to a right box, which represents the state after a failure, with the `::Fail` method.

v8::internal::wasm
::AsyncStreamingDecoder::Fail
