

```
v8::internal::compiler  
::turbohaft::StaticCanonical  
ForLoopMatcher::CountIterationsImpl
```

```
graph LR; A["v8::internal::compiler  
::turbohaft::StaticCanonical  
ForLoopMatcher::CountIterationsImpl"] --> B["v8::internal::compiler  
::turbohaft::IterationCount  
::Approx"]
```

A diagram showing a call from a static canonical function to an approximation function. The left box contains the code for the static canonical function, and the right box contains the code for the approximation function. A blue arrow points from the left box to the right box.

```
v8::internal::compiler  
::turbohaft::IterationCount  
::Approx
```
