v8::internal::SharedFunction  
Info::GetOuterScopeInfo

v8::internal::SharedFunction  
Info::HasOuterScopeInfo

```
graph LR; A[v8::internal::SharedFunctionInfo::DiscardCompiledMetadata] --> C[v8::internal::SharedFunctionInfo::HasOuterScopeInfo]; B[v8::internal::SharedFunctionInfo::GetOuterScopeInfo] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::SharedFunctionInfo::DiscardCompiledMetadata' (top) and 'v8::internal::SharedFunctionInfo::GetOuterScopeInfo' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::SharedFunctionInfo::HasOuterScopeInfo'. Two blue arrows point from the source functions to the target function, indicating that both source functions are related to or perhaps call the target function.
