

v8::internal::DateParser
::DateToken::EndOfInput

```
graph LR; A["v8::internal::DateParser  
::DateToken::EndOfInput"] --> B["v8::internal::DateParser  
::DateToken::DateToken"]
```

A diagram showing a transition between two states of the v8::internal::DateParser::DateToken class. The left state is 'EndOfInput' (shaded box) and the right state is 'DateToken' (white box). A blue arrow points from the left state to the right state.
