

v8::internal::wasm
::Decoder::consume_u16

```
graph LR; A["v8::internal::wasm  
::Decoder::consume_u16"] --> B["v8::internal::wasm  
::name"]
```

A diagram showing a call from the function `consume_u16` to the `name` property. The source box is shaded gray and the target box is white. A blue arrow points from the source to the target.

v8::internal::wasm
::name
