

```
v8::internal::maglev  
::MaglevGraphBuilder  
::GetUint8ClampedForToNumber
```

A diagram illustrating a call path. On the left, a white box with a black border contains the public API: `v8::internal::maglev::MaglevGraphBuilder::GetUint8ClampedForToNumber`. A blue arrow points from the right side of this box to the right side of a gray box on the right. The gray box contains the internal implementation: `v8::internal::maglev::anonymous_namespace{maglev-graph-builder}::cc::ClampToUint8`.

```
v8::internal::maglev  
::anonymous_namespace  
{maglev-graph-builder  
  ::cc}::ClampToUint8
```
