

v8::internal::maglev
::MaglevGraphBuilder
::VisitCompareOperation

```
graph LR; A["v8::internal::maglev  
::MaglevGraphBuilder  
::VisitCompareOperation"] --> B["v8::internal::maglev  
::MaglevGraphBuilder  
::GetInternalizedString"]
```

A diagram showing a call from the `VisitCompareOperation` method of the `MaglevGraphBuilder` class to the `GetInternalizedString` method of the same class. The left box is white with a black border, and the right box is gray with a black border. A blue arrow points from the left box to the right box.
