

v8::internal::torque  
::Grammar::CheckIf

v8::internal::torque  
::Grammar::Sequence

v8::internal::torque  
::Grammar::TryOrDefault

v8::internal::torque  
::Grammar::NewSymbol

```
graph LR; A[v8::internal::torque::Grammar::CheckIf] --> D[v8::internal::torque::Grammar::NewSymbol]; B[v8::internal::torque::Grammar::Sequence] --> D; C[v8::internal::torque::Grammar::TryOrDefault] --> D;
```

The diagram illustrates a call graph or dependency structure. Three source functions on the left are connected by blue arrows to a single target function on the right. The target function, 'v8::internal::torque::Grammar::NewSymbol', is highlighted with a gray background, while the source functions have white backgrounds. The arrows originate from the bottom-right of the first source box, the right side of the second source box, and the top-right of the third source box, all converging on the left side of the target box.
