

```
v8::internal::FixedArray  
::RightTrim
```

A diagram showing a relationship between two V8 internal classes. On the left, a gray box contains the text 'v8::internal::FixedArray' and '::RightTrim'. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::TaggedArray', 'Base< FixedArray, TaggedArrayShape', and '>::RightTrim'. This indicates that TaggedArray inherits from FixedArray and overrides the RightTrim method.

```
v8::internal::TaggedArray  
Base< FixedArray, TaggedArrayShape  
>::RightTrim
```
