

v8::internal::wasm  
::AsyncStreamingProcessor  
::OnAbort

v8::internal::wasm  
::AsyncStreamingProcessor  
::OnFinishedStream

v8::internal::wasm  
::WasmEngine::StreamingCompilation  
Failed

```
graph LR; A["v8::internal::wasm::AsyncStreamingProcessor::OnAbort"] --> C["v8::internal::wasm::WasmEngine::StreamingCompilation Failed"]; B["v8::internal::wasm::AsyncStreamingProcessor::OnFinishedStream"] --> C;
```

The diagram illustrates a flow where two distinct events from the AsyncStreamingProcessor (OnAbort and OnFinishedStream) both lead to a common state of StreamingCompilation Failed within the WasmEngine. The source boxes are white, and the destination box is gray.
