v8::internal::torque
::DeclarationVisitor
::Visit

v8::internal::torque
::KytheData::AddFunctionDefinition

```
graph LR; A["v8::internal::torque::KytheData::AddCall"] --> C["v8::internal::torque::KytheData::AddFunctionDefinition"]; B["v8::internal::torque::DeclarationVisitor::Visit"] --> C;
```

The diagram illustrates a call graph or dependency structure. On the left, two white rectangular boxes represent source functions. The top box contains the text 'v8::internal::torque::KytheData::AddCall'. The bottom box contains the text 'v8::internal::torque::DeclarationVisitor::Visit'. On the right, a gray rectangular box represents the target function, containing the text 'v8::internal::torque::KytheData::AddFunctionDefinition'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions call or depend on the target function.
