

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class v8_internal_detail_is_simple_subtype["v8::internal::detail::is_simple_subtype<Smi, Object>"]
    v8_internal_detail_is_simple_subtype --|> std_true_type
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded box representing the class `v8::internal::detail::is_simple_subtype<Smi, Object>`. It has three horizontal sections, with the top one containing the class name. Above it is a white box representing the class `std::true_type`, also with three horizontal sections, the top one containing the class name. A blue arrow with an open triangular head points from the top of the gray box to the bottom of the white box, indicating that `v8::internal::detail::is_simple_subtype<Smi, Object>` inherits from `std::true_type`.

v8::internal::detail
::is_simple_subtype<
Smi, Object >
