

v8::internal::baseline
::BaselineBatchCompiler
::EnqueueFunction

```
graph LR; A["v8::internal::baseline  
::BaselineBatchCompiler  
::EnqueueFunction"] --> B["v8::internal::baseline  
::BaselineBatchCompiler  
::concurrent"]
```

A diagram showing a transition from a baseline compiler to a concurrent one. It consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains the text 'v8::internal::baseline', '::BaselineBatchCompiler', and '::EnqueueFunction'. The right box is gray with a black border and contains the text 'v8::internal::baseline', '::BaselineBatchCompiler', and '::concurrent'.
