

constexpr

```
classDiagram
    class constexpr {
    }
    class TypeForBits {
        < 64 >
    }
    constexpr "1" *-- "1" TypeForBits
```

The diagram shows a class hierarchy or composition. The top class is 'constexpr', which has two empty rectangular slots below its name. A vertical line connects the bottom of 'constexpr' to the top of a larger class box. To the right of this line is the text '+nan'. The connection ends in a diamond shape, indicating a composition relationship. The bottom class box is shaded gray and contains the text 'v8::internal::compiler::turbohaft::detail::TypeForBits< 64 >' followed by two empty rectangular slots.

+nan

v8::internal::compiler
::turbohaft::detail::
TypeForBits< 64 >
