

v8::internal::Isolate
::Isolate

v8::internal::wasm
::WasmInterpreter::WasmInterpreter

v8::internal::trap
_handler::SetLandingPad

```
graph LR; A[v8::internal::Isolate::Isolate] --> C[v8::internal::trap_handler::SetLandingPad]; B[v8::internal::wasm::WasmInterpreter::WasmInterpreter] --> C;
```

The diagram illustrates a dependency or relationship between three V8 JavaScript engine components. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::Isolate::Isolate'. The bottom box contains the text 'v8::internal::wasm::WasmInterpreter::WasmInterpreter'. On the right, there is a gray rectangular box containing the text 'v8::internal::trap_handler::SetLandingPad'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both the Isolate and the WasmInterpreter have a dependency on or interact with the trap handler's SetLandingPad method.
