

v8::internal::torque
::StructType::PackedSize

```
graph LR; A[v8::internal::torque::StructType::PackedSize] --> B[v8::internal::torque::AggregateType::fields]; B --> C[v8::internal::torque::AggregateType::Finalize];
```

The diagram illustrates a three-step process flow. It begins with a gray-shaded box containing the text 'v8::internal::torque::StructType::PackedSize'. A dark blue arrow points from this box to a white box containing 'v8::internal::torque::AggregateType::fields'. A second dark blue arrow points from the middle box to a final white box containing 'v8::internal::torque::AggregateType::Finalize'.

v8::internal::torque
::AggregateType::fields

v8::internal::torque
::AggregateType::Finalize
