

v8::internal::Scanner  
::ErrorState::ErrorState

```
graph LR; A["v8::internal::Scanner  
::ErrorState::ErrorState"] --> B["v8::internal::Scanner  
::Location::invalid"]
```

A diagram showing a transition from an error state to an invalid location. On the left, a gray rectangular box contains the text "v8::internal::Scanner" and "v8::internal::Scanner::ErrorState::ErrorState". A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text "v8::internal::Scanner" and "v8::internal::Scanner::Location::invalid".
