

ObjectHashTableBase

```
classDiagram
    class ObjectHashTableBase {
    }
    class v8_internal_ObjectHashTable["v8::internal::ObjectHashTable< ObjectHashTable, ObjectHashTableShape >"] {
    }
    v8_internal_ObjectHashTable --|> ObjectHashTableBase
```

The diagram illustrates a class hierarchy. At the top is a class box for 'ObjectHashTableBase', which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are shaded gray. Below this is a class box for 'v8::internal::ObjectHashTable< ObjectHashTable, ObjectHashTableShape >'. This box is divided into three horizontal sections: the top section contains the full class name, and the two bottom sections are empty. A blue arrow with an open triangular head points from the bottom of the 'v8::internal::ObjectHashTable' box to the bottom of the 'ObjectHashTableBase' box, indicating that 'v8::internal::ObjectHashTable' inherits from 'ObjectHashTableBase'.
