

v8::internal::OrderedHash
Table::RemovedIndexAt

v8::internal::OrderedHash
Table::SetRemovedIndexAt

v8::internal::OrderedHash
Table::RemovedHolesIndex

```
graph LR; A[v8::internal::OrderedHash Table::RemovedIndexAt] --> C[v8::internal::OrderedHash Table::RemovedHolesIndex]; B[v8::internal::OrderedHash Table::SetRemovedIndexAt] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::OrderedHash Table::RemovedIndexAt' (top) and 'v8::internal::OrderedHash Table::SetRemovedIndexAt' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::OrderedHash Table::RemovedHolesIndex'. Two blue arrows point from the source functions to the target function, indicating that both source functions are related to or point to the target function.
