

v8::internal::maglev
::Int32Identity

```
graph LR; A["v8::internal::maglev  
::Int32Identity"] --> B["v8::internal::UNREACHABLE"]
```

A diagram showing a mapping from a source identifier to a target state. The source is a gray box containing the text 'v8::internal::maglev::Int32Identity'. A blue arrow points from this box to a white box on the right containing the text 'v8::internal::UNREACHABLE'.

v8::internal::UNREACHABLE
