

v8::Shell::RunMain

v8::internal::RUNTIME
_FUNCTION

v8::internal::Snapshot
::SerializeDeserializeAndVerify
ForTesting

```
graph LR; A[v8::Shell::RunMain] --> C[v8::internal::Snapshot::SerializeDeserializeAndVerifyForTesting]; B[v8::internal::RUNTIME_FUNCTION] --> C;
```

The diagram illustrates a call graph where two different entry points, `v8::Shell::RunMain` and `v8::internal::RUNTIME_FUNCTION`, both lead to the same internal function, `v8::internal::Snapshot::SerializeDeserializeAndVerifyForTesting`. The source functions are in white boxes, and the target function is in a gray box. Blue arrows indicate the flow of control from the sources to the target.
