

v8\_inspector::V8Inspector  
SessionImpl::dispatchProtocolMessage

v8\_inspector::V8Inspector  
SessionImpl::SendProtocolNotification

v8\_inspector::V8Inspector  
::Channel::sendNotification

```
graph LR; A["v8_inspector::V8Inspector  
SessionImpl::dispatchProtocolMessage"] --> C["v8_inspector::V8Inspector  
::Channel::sendNotification"]; B["v8_inspector::V8Inspector  
SessionImpl::SendProtocolNotification"] --> C;
```

The diagram illustrates a call flow where two different functions in the `v8_inspector::V8Inspector` namespace call a common target function, `::Channel::sendNotification`. The source functions are `SessionImpl::dispatchProtocolMessage` and `SessionImpl::SendProtocolNotification`. The target function is highlighted in a gray box, and blue arrows indicate the direction of the calls.
