

v8::internal::compiler
::InstructionScheduler
::ScheduleGraphNode::set
_total_latency

```
graph LR; A["v8::internal::compiler  
::InstructionScheduler  
::ScheduleGraphNode::set  
_total_latency"] --> B["v8::internal::compiler  
::InstructionScheduler  
::ScheduleGraphNode::latency"]
```

A diagram showing a call from the `set_total_latency` method to the `latency` property. The left box is shaded gray and contains the text `v8::internal::compiler::InstructionScheduler::ScheduleGraphNode::set_total_latency`. A blue arrow points from the right side of this box to the right box. The right box is white and contains the text `v8::internal::compiler::InstructionScheduler::ScheduleGraphNode::latency`.
