

v8::internal::interpreter  
::BytecodeRegisterOptimizer  
::RegisterTransfer

```
graph LR; A["v8::internal::interpreter  
::BytecodeRegisterOptimizer  
::RegisterTransfer"] --> B["v8::internal::interpreter  
::BytecodeRegisterOptimizer  
::RegisterInfo::IsInSameEquivalenceSet"]
```

A diagram showing a call from the `RegisterTransfer` method of the `v8::internal::interpreter::BytecodeRegisterOptimizer` class to the `IsInSameEquivalenceSet` method of the `v8::internal::interpreter::RegisterInfo` class. The source box is white, and the target box is gray.
