

v8::internal::compiler
::VisitBinop

v8::internal::compiler
::VisitRRO

v8::internal::compiler
::RiscvOperandGenerator
::UseOperand

```
graph LR; A[v8::internal::compiler::VisitBinop] --> C[v8::internal::compiler::RiscvOperandGenerator::UseOperand]; B[v8::internal::compiler::VisitRRO] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, two white rectangular boxes represent the source functions: 'v8::internal::compiler::VisitBinop' (top) and 'v8::internal::compiler::VisitRRO' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::compiler::RiscvOperandGenerator::UseOperand'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions are mapped to or implemented by the target function.
