

v8::base::EmulatedVirtual
AddressSubspace::RecommitPages

v8::base::VirtualAddress
SpacePageAllocator::RecommitPages

v8::VirtualAddressSpace
::RecommitPages

```
graph LR; A[v8::base::EmulatedVirtualAddressSubspace::RecommitPages] --> C[v8::VirtualAddressSpace::RecommitPages]; B[v8::base::VirtualAddressSpacePageAllocator::RecommitPages] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes represent source functions: 'v8::base::EmulatedVirtualAddressSubspace::RecommitPages' (top) and 'v8::base::VirtualAddressSpacePageAllocator::RecommitPages' (bottom). On the right, a gray rectangular box represents the target function: 'v8::VirtualAddressSpace::RecommitPages'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions call or delegate to the target function.
