

v8::internal::RelocInfo

```
graph BT; WR[v8::internal::WritableRelocInfo] --> RI[v8::internal::RelocInfo];
```

The diagram illustrates a relationship between two V8 internal classes. At the bottom is a gray-shaded box labeled 'v8::internal::WritableRelocInfo'. A blue arrow points vertically upwards from this box to a white box at the top labeled 'v8::internal::RelocInfo'. This indicates that 'v8::internal::WritableRelocInfo' inherits from or is a specialization of 'v8::internal::RelocInfo'.
