

v8::internal::SwissNameDictionary
::DetailsAt

v8::internal::SwissNameDictionary
::DetailsAtPut

v8::internal::SwissNameDictionary
::PropertyDetailsTable

```
graph LR; A[v8::internal::SwissNameDictionary::DetailsAt] --> C[v8::internal::SwissNameDictionary::PropertyDetailsTable]; B[v8::internal::SwissNameDictionary::DetailsAtPut] --> C;
```

The diagram illustrates a mapping from two source functions to a single target table. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::SwissNameDictionary::DetailsAt' and the bottom box contains 'v8::internal::SwissNameDictionary::DetailsAtPut'. On the right, there is a gray rectangular box containing 'v8::internal::SwissNameDictionary::PropertyDetailsTable'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both source functions point to the same target table.
