

cppgc::internal::BasePage
::TryObjectHeaderFromInnerAddress

```
graph LR; A["cppgc::internal::BasePage  
::TryObjectHeaderFromInnerAddress"] --> B["cppgc::internal::NormalPage  
::PayloadContains"]
```

The diagram consists of two rectangular boxes connected by a horizontal arrow. The left box is white with a black border and contains the text 'cppgc::internal::BasePage' on the first line and '::TryObjectHeaderFromInnerAddress' on the second line. The right box is gray with a black border and contains the text 'cppgc::internal::NormalPage' on the first line and '::PayloadContains' on the second line. A dark blue arrow points from the right side of the left box to the left side of the right box.

cppgc::internal::NormalPage
::PayloadContains
