

std::true_type

```
graph BT; A["v8::internal::detail  
::is_simple_subtype<  
Object, Union< HeapObject,  
MaybeWeak< HeapObject >,  
Smi > >  
<br/><br/>"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a large gray rectangle representing the base class `v8::internal::detail`. It contains the text `::is_simple_subtype< Object, Union< HeapObject, MaybeWeak< HeapObject >, Smi > >` in its top section, with two empty gray sections below it. A blue arrow points upwards from the top center of this rectangle to the bottom center of a white rectangle above it. The white rectangle represents the derived class `std::true_type` and is divided into three horizontal sections, with the top section containing the text `std::true_type`.

v8::internal::detail
::is_simple_subtype<
Object, Union< HeapObject,
MaybeWeak< HeapObject >,
Smi > >
