

v8::internal::FeedbackVector
::RequestOsrAtNextOpportunity

v8::internal::FeedbackVector
::reset_osr_urgency

v8::internal::FeedbackVector
::set_osr_urgency

```
graph LR; A[v8::internal::FeedbackVector::RequestOsrAtNextOpportunity] --> C[v8::internal::FeedbackVector::set_osr_urgency]; B[v8::internal::FeedbackVector::reset_osr_urgency] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::FeedbackVector::RequestOsrAtNextOpportunity' (top) and 'v8::internal::FeedbackVector::reset_osr_urgency' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::FeedbackVector::set_osr_urgency'. Two blue arrows point from the source functions to the target function, indicating that both source functions call or interact with the target function.
