

v8::base::RegionAllocator  
::AllocateRegion

v8::internal::wasm  
::fuzzing::anonymous  
\_namespace{random-module  
-generation::cc}::BodyGen  
::GenerateRef

random

```
graph LR; A["v8::base::RegionAllocator::AllocateRegion"] --> C[random]; B["v8::internal::wasm::fuzzing::anonymous_namespace{random-module-generation::cc}::BodyGen::GenerateRef"] --> C;
```

The diagram illustrates two function calls directed towards a common target labeled 'random'. The first call originates from 'v8::base::RegionAllocator::AllocateRegion' and the second from 'v8::internal::wasm::fuzzing::anonymous\_namespace{random-module-generation::cc}::BodyGen::GenerateRef'. Both calls are represented by blue arrows pointing to a grey rectangular box containing the word 'random'.
